

Wen Yu Chang

PH.D. STUDENT

✉ yu.chang36@gmail.com | 📧 [mo000oser999](#) | [in](#) Wen Yu (Morris) Chang | 🎓 Wen Yu Chang (Morris)

Education

National Taiwan University

Taipei, Taiwan

PH.D. IN COMPUTER SCIENCE AND INFORMATION ENGINEERING (DIRECT PH.D. PROGRAM)

Feb. 2025 – Present

- Advisor: Prof. Yun-Nung (Vivian) Chen
- Admitted directly from the M.S. program in Data Science
- Research interests: agent memory system, language model personalization, conversational agents and dialogue systems

National Taiwan University

Taipei, Taiwan

M.S. PROGRAM IN DATA SCIENCE

Mar. 2022 – Jan. 2025

- Transferred to the Ph.D. program prior to degree conferral
- Advisor: Prof. Yun-Nung (Vivian) Chen
- GPA: **4.12**/4.3

National Taiwan University

Taipei, Taiwan

B.B.A. IN ACCOUNTING

Sept. 2016 – Jan. 2022

- GPA: **4.00**/4.3
- Relevant coursework: Data Structures and Algorithms, Algorithm Design and Analysis, Machine Learning, and Applied Deep Learning.
- Average GPA of related coursework: **4.09**/4.3

Experience

Wistron Corporation

Taiwan

INDUSTRY-ACADEMIA RESEARCH COLLABORATOR

Dec. 2025 – Present

- Assisted in building a human annotation pipeline for evaluating and improving language-model-based systems.
- Contributed to benchmark construction, including task formulation, annotation protocol design, and data quality control.
- Supported the development of evaluation workflows for measuring model behavior under realistic task settings.
- Communicated with collaborators to align annotation guidelines, evaluation criteria, and project milestones.

Taiwan Semiconductor Manufacturing Company (TSMC)

Taiwan

INDUSTRY-ACADEMIA RESEARCH COLLABORATOR

Dec. 2024 – Feb. 2026

- Collaborated on research and system design for knowledge graph construction, inference pipelines, and SOP-grounded retrieval.
- Investigated methods for retrieving, following, and reasoning over large-scale standard operating procedures in industrial settings.
- Contributed to the design of a knowledge-intensive pipeline that connects structured knowledge, retrieval modules, and downstream reasoning components.
- Coordinated research discussions and technical requirements across academic and industrial stakeholders.

MaverickP, Inc.

Taipei, Taiwan

AI ENGINEER

June 2023 – Mar. 2026

- Developed LLM-based agentic systems for automating predefined human workflows, including product market analysis and domain-specific question answering.
- Designed and optimized prompts for an LLM-enhanced agentic QA system, improving task grounding and response reliability.
- Constructed structured product knowledge resources, including product specification knowledge graphs, to support factual and controllable generation.
- Integrated multiple external and internal tools, including databases, web search, APIs, and knowledge graphs, to enhance the factual grounding of LLM agents.
- Collaborated with cross-functional teams to translate business requirements into executable AI workflows and system-level prototypes.

Knowledge Acquisition and Dialogue Research Team, RIKEN Guardian Robot Project

Kyoto, Japan

RESEARCH INTERN

July 2023 – Sept. 2023

- Conducted research on memory system design for assistive robots, focusing on how robots can generate, store, retrieve, and update narrative memories.
- Used Large Language Models to simulate realistic human-robot interaction scenarios and study memory generation in long-term dialogue settings.
- Explored LLM-based mechanisms for memory abstraction and forgetting to support contextually relevant robot responses.

National Taiwan University

Taipei, Taiwan

TEACHING ASSISTANT, APPLIED DEEP LEARNING

Mar. 2022 – Dec. 2023

- Designed, assigned, and evaluated NLP-related assignments, including Chinese news summarization and neural text generation tasks.
- Mentored students on deep learning concepts, model implementation, experimental design, and assignment debugging.
- Provided instructional support by clarifying lecture materials, reviewing student submissions, and guiding project development.

National Taiwan University

Taipei, Taiwan

TEACHING ASSISTANT, ARTIFICIAL INTELLIGENCE

Mar. 2023 – June 2023

- Developed an assignment on representation learning, covering PCA, autoencoders, and denoising autoencoders.
- Supported students in understanding core AI concepts through implementation-based exercises and technical discussions.

Skills

NLP	Pytorch, Langchain, Neo4j, vllm
Programming	Python, Bash, C++, C
Languages	Mandarin (Native), English
TOEFL iBT	107/120 (R: 30, L: 30, S: 23, W: 24)
GRE	329/340 (V:159, Q: 170, AWA:4.0)
